DETAILED ACTION

1. This office action is in response to Board's decision dated on 7/20/2009.
2. Claims 67-70 are presented for examination.

Allowable Subject Matter

3. The present invention is directed to software with which a cabinetmaker works with customer A to design and lay out the kitchen, choosing materials, components, and supplies from those offered in the catalog. The software is used to create a sales proposal and quotation which are sent by the cabinetmaker to the customer, who accepts the sales proposal and orders the cabinets from the cabinetmaker. Using the software, the cabinetmaker orders the materials, components, and supplies required for the job. Customer A is then invoiced. The cabinetmakers software is also used to either create shop drawings and manufacturing information for traditional manufacturing or, to produce the computer numerical control (CNC) code required to operate a CNC router to produce the required components.
4. The closest prior art are:

Carlin (2002/0093538) is directed to the computerized composition and display of photorealistic perspective images of real or virtual three-dimensional objects, for the purposes of (i) promoting or selling the depicted objects directly to a consumer, and/or (ii) generating advertising images of the objects. Carlin prepares budgets and invoices, and furnishings and swatches may be ordered.

Article by Robin Willems titled "A CAD Applications to Support the Design of Injection Moulds Using High-level Mould objects" teaches a system that integrates a

design catalogue which allows to store any design object in order to reuse it in another, similar mould design in the future. This protocol allows the automation module to access the objects in a standardized way.

With respect to sole independent claim 67, according to Board of Appeals decision dated 7/20/2009 the closest prior art alone or in combination fail to teach **"operating said computer utilizing said software by said second party to generate a selected design of said composite product, a bill of materials for said designed composite product and a program for instructing said CNC machine to machine certain components of said designed composite product"**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
